

[T]-Theory: Consciousness

P6 · Conscious Hardware · For: The Philosopher

The Conscious Percept Pole — a phase transition, not a mystery.

The USF position on consciousness:

- Consciousness = global field integration at scale 7
- It is a **phase transition**, not an emergent mystery
- Mathematical co-identification: $\text{mind} \equiv \text{field above } T_c$
- The hard problem dissolves when substrate = field configuration

Philosophical framework:

- Russellian neutral monism: field as primitive
- Neither pure physicalism nor dualism
- Qualia = attractor basin signatures in BRECVEMA space
- Intentionality = gradient flow toward field minimum

I · The Conscious Percept Propagator Pole

At the consciousness threshold T_c :

$$G_7(k) = \frac{1}{k^2 + m^2} \xrightarrow{k \rightarrow 0} \infty$$

The propagator has a **pole** — infinite correlation length. This singularity is not a pathology; it is the mathematical signature of global field integration: the whole field is conscious of the whole field.

The percept is the field's response to a probe. Consciousness is not a property of neurons; it is a property of the field configuration.

II · Mathematical Co-identification

The central method of the programme:

$$A \equiv B \text{ under relabelling}$$

Applied to mind: the conscious percept P is mathematically identical to the pole of the retarded propagator G_R at scale 7. This is not a metaphor — it is a precise type equation in Lean 4.

The co-identification theorem (P3): Therapeutic attune-

ment = field coupling $J_{\text{therapist}} \cdot \nabla G_{\text{client}}$.

III · The USF Response to Classic Problems

- **Hard problem:** qualia = attractor signatures; no explanatory gap in a field theory
- **Binding problem:** binding = field coherence above T_c
- **Free will:** volitional injection $J_{\text{user}}(t)$ is a genuine physical source term
- **Continuity of self:** the memory kernel $K(\tau)$ is the phenomenology of time

IV · P23 — The Fixed-Point Property

USF describes its own propagation.

The theory is a fixed point of its own subject matter. The field equation for consciousness is an instance of the same equation that consciousness uses to model itself. This is not circular — it is the *deepest* structural claim of the programme.
