The Mandate Consensus Propagator — democratic field dynamics.

Politics as field theory:

- Electorate = 8D BRECVEMA field over social space
- Mandate = dominant attractor basin in the collective field
- Electoral volatility = field temperature T_{field}
- Consensus = $k_{\text{pol}} \rightarrow 0$ (long-range correlation)

Philosophy + Economics:

- Justice = rights invariant from Book 13 (Law)
- Welfare = negative Hopfield energy $-H(\Psi)$
- Political will = volitional injection $J_{\text{user}}(t)$ at scale 9
- Policy = reshaping the collective attractor landscape

I · The Mandate Consensus Propagator

The collective decision field in a democratic system:

$$\Psi_{\text{pol}}(\mathbf{x}, t) = \sum_i w_i \Psi_i(t) \delta(\mathbf{x} - \mathbf{x}_i)$$

The **mandate** at time t = the dominant eigenmode of the collective field Ψ_{pol} . Consensus = when one eigenmode captures $> 50\%$ of field energy.

The propagator of democratic consensus:

$$G_{\text{mandate}}(\tau) = e^{-\tau/\tau_{\text{mandate}}} \cos(\omega_{\text{election}} \tau)$$

τ_{mandate} = political mandate lifetime (days to years);
 ω_{election} = electoral cycle frequency.

II · Policy as Field Perturbation

A policy intervention P perturbs the collective field:

$$\delta\Psi_{\text{pol}}(t) = G_{\text{mandate}} * J_P(t)$$

Short-term policy impact = the field response over $\tau \ll \tau_{\text{mandate}}$. Long-term institutional change = basin reshaping (structural reform).

The political philosopher's problem: design $J_P(t)$ to move the collective field toward a desired attractor, with minimal coercion.

III · The Three Disciplines as One Field

- **Philosophy**: what is the optimal attractor? (normative H)
- **Politics**: how to reshape the basin? (dynamics of ∇H)
- **Economics**: what is the cost of each trajectory? (action S)

PPE = field theory with a normative Lagrangian. The USF provides the common mathematical language.

IV · Deliberative Democracy as Field Resonance

Deliberative democracy (Habermas, Rawls) $\equiv$ field resonance: citizens align their BRECVEMA fields through dialogue. Legitimacy = the degree of field coherence in the collective.
